

AZ-Actuation: modular, safe and simple!

Large range of actuations

- manual operation with hand lever or gear box
- pneumatic actuators
- electric actuators
- hydraulic actuators

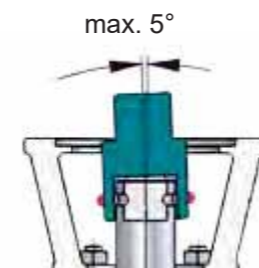

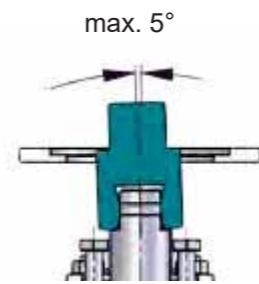

Cardanic coupling

- patented AZ coupling to connect plug shaft and actuator
- no lateral forces on valve stem

Benefit:

very long lifetime of the valve

All components verified and tested

Bracket according to ISO 5211

- standard installation of gearbox and actuator
- safe due to independent mounting of cover and bracket
- covering bonnet bolts to prevent opening of valve in service
- precise centering of the bracket to the plug stem due to adjusting ring
- easy inline plug adjustment during the process, screws are always accessible
